- Configuration Item
  - Configuration Library
- Configuration Management Strategy
  - Procedure
  - Issue and Change Control
  - Tools and Techniques
  - Records
  - Reporting
  - Timing
  - Scales for Priority and Severity

UNIVERSITY OF WOLVERHAMPTON

Configuration Management

- Configuration helps the project manager by ensuring that the right documents and data are available when needed
- Configuration management supports change control by keeping a record of changes to key documents including the date(s) of changes and synopsises of why they were made
- Good standards and compliance by the project team can keep documentation relevant, organised, and minimises risks
