Tableau Training 04

1. Filters in Tableau

1. **Top Filters**:
    - Use to display top N values based on a measure.
    - Example:
        - Drag Sub-Category to **Rows** and Sales to **Columns**.
        - Right-click Sub-Category → Choose **Top → By Field** → Select Top 5 by Sum of Sales.
2. **Filter Operations**:
    - Filters for **Measures**:
        - Types: Range of Values, At Least, At Most, Special (Null/Non-null).
    - Filters for **Dimensions**:
        - Types: General, Wildcard, Condition, and Top filters.
3. **Clearing Filters**:
    - Remove filters by using **Clear Filter** in the **Filters Shelf**.

---

2. Charts in Tableau

1. **Bar Charts**:
    - **Simple Bar Chart**:
        - Drag Profit to **Columns** and Sub-Category to **Rows**.
    - **Bar Chart with Colour Range**:
        - Drag Profit to **Colour** in the **Marks Pane** for color-coded bars.
    - **Stacked Bar Chart**:
        - Add a dimension (e.g., Segment) to **Colour** for segmentation.
2. **Line Charts**:
    - **Simple Line Chart**:
        - Drag a dimension (e.g., Ship Mode) to **Columns** and Sales to **Rows**.
    - **Multiple Measures**:

        - Add additional measures to create multiple lines.

3. **Pie Charts**:
    - **Simple Pie Chart**:
        - Drag Region to **Colour** and Profit to **Size** in the **Marks Pane**.
    - **Drill-Down Pie Chart**:
        - Use dimensions with hierarchy for deeper insights.
4. **Crosstab Charts**:
    - **Simple Crosstab**:
        - Drag Order Date to **Columns**, Region and Segment to **Rows**, and Sales to **Labels**.
    - **Colour Encoded Crosstab**:
        - Drag Sales to **Colour** for value-based shading.
5. **Scatter Plots**:
    - Drag Sales to **Columns** and Profit to **Rows**.
    - Add a dimension (e.g., Sub-Category) to **Labels** for detailed scatter points.
6. **Bubble Charts**:
    - Drag Profit to **Size**, Ship Mode to **Colour**, and optionally to **Labels** for a visual bubble chart.
7. **Bullet Graphs**:
    - Drag Sub-Category to **Columns** and Sales and Profit to **Rows**.
    - Use **Show Me** to select the bullet graph type.
8. **Box Plots**:
    - Drag Category to **Columns** and Profit to **Rows**.
    - Select **Box-and-Whisker Plot** from **Show Me**.
9. **Tree Maps**:
    - Drag Profit to both **Size** and **Color** in the **Marks Pane**.
    - Add dimensions like Ship Mode or Region for nested structures.

---

3. Advanced Features

1. **Colour and Label Enhancements**:
    - Use the **Labels Shelf** to add textual details.
    - Use **Colour Shelf** to encode data visually for deeper insights.
2. **Drill-Down Features**:
    - Apply hierarchies in dimensions (e.g., Sub-Category → Manufacturer → Product Name) for detailed exploration.
